

Symbolic Linking

- On Win2000 machine "u5pc2" we have the following mapped for account 02023:
H:\ is the home directory of the 02023 account <-- all files should be saved here!!!
W:\ is a directory holding web pages for HiRA (and the experiment 02023 as well)
- you can make a symbolic link by `ln -s /user/event3/02023/complete evt-data`
