MANUAL CHANGE INFORMATION

At Tektronix, we continually strive to keep up with latest electronic developments by adding circuit and component improvements to our instruments as soon as they are developed and tested.

Sometimes, due to printing and shipping requirements, we can't get these changes immediately into printed manuals. Hence, your manual may contain new change information on following pages.

A single change may affect several sections. **Since the** change information sheets **are** carried in the manual until all changes are permanently entered, some duplication may occur. If no such change pages **appear** following this page, your manual is correct as printed.
